CZECH HEALTHCARE SOLUTIONS: Modular Medical Unit with Ambulant and Surgery Care

Modular Medical Unit is designed for basic examination of female patients in the gynecological part of the unit and possible minor intervention before sending for specialized treatment. In the surgical part, it is also possible to perform an examination of injuries and treatment of minor injuries, or the provision of the first medical care before sending for special treatment. The unit also contains a small collection of blood and urine samples with laboratory for basic sampling and preparation of samples for more complex analysis. Unit is mobile, it needs to be put on paved area and connected to electricity.

Completion of modules C and D

- + Unit contains two modules of 40" HC containers:
- C – gynecological outpatient unit and small-scale surgical outpatient unit
- D – sampling (bleeding) room with laboratory
- + Allows for the expansion of healthcare provision in places where adequate hospital facilities are not available or existing facilities need to be strengthened

PROFIL Hospital Furnishing

The Graciella® chair

- + The chair can be easily adjusted into a horizontal position
- + The hand controller can be accessed from various angles thanks to a rotating mechanism
- + The foot controller allows the chair to be quickly adjusted even during examination

- + Maximal functionality, mechanical, chemical and waterproof resistance and easy care
- + Hygienic and health safety for every piece of our furniture

Stainless steel plates

- + Perfect hand production supported by the latest technology
- + Special surface treatment - grinding K400 with the highest level of resistance to minor mechanical damage

Multifunctional furniture

- + Complete production of stainless steel tables and multifunctional furniture with a high degree of variability
