CZECH HEALTHCARE SOLUTIONS: MMU with Gynecological and Maternity Unit

Modular Medical Unit is designed for easy transportation and installation into standard 40" High Cube containers that are modified to fulfill needs of medical use. The unit contains two maternity places for women in the advanced stage of childbirth and, thanks to the sectional operating room, allows even more complicated births. Unit is mobile, it needs to be put on paved area and connected to electricity.

Completion of modules E and F

- + Unit contains two modules of 40" HC containers:
- E – sectional operating room for complex births ("Caesarian Theater")
- F – two delivery units with newborn care
- + Allows for the expansion of healthcare provision in places where adequate hospital facilities are not available or existing facilities need to be strengthened

Birthing bed AVE 2

- + Perfectly suitable for all delivery phases

- + Women in labour can freely choose their birthing position

Bottle gas stations with monitoring equipment

- + Easy delivery of stored medical gas with having power from network

- + Monitoring of pre-set pressure values and reporting of their deviations and/or failures

Infant radiant warmer Natally

- + Safe and comfortable environment for newborn children
- + For delivery rooms and subsequent intensive care

Electrocoagulator SMT BM M 400 PF

- + Easy to operate and reliable 400W electrosurgical device with compact and ergonomic (infection control) design
- + Efficient solution for birth complications

Hot-Air sterilizer BMT STERICELL 55 ECO

- + 55 liters, sterilization programs 160-180°C
- + Microprocessor process control Fuzzy logic, LCD display
- + Stainless steel interior with 2 shelves

Infusion stand

- + Quality construction made of AISI304 stainless steel
- + The stands are adapted to any demanding operation thanks to anti-static design of the stand
- + Adjustable height of the cross-bracket including 4 hooks for hanging infusions etc.
